Full Stack Software Developer

(502)-777-7878 | aj6287@gmail.com | Oklahoma City, OK | [linkedin.com/in/anthony-seadler](https://www.linkedin.com/in/anthony-seadler) | github.com/ajSeadler |

TECHNICAL SKILLS

Proficient: Node, Javascript, React / Redux, Git, Express, HTML5, CSS

Knowledgeable: Vue, Angular, Ruby

TECHNICAL PROJECTS

Fork-It (Reviews website) | Front and Back-End | Oct.-Nov.2023 | [Link to the project](#)

- Designed and developed a review website for local restaurants, enabling user sign-up and login to leave reviews.
- Developed with the PERN stack.
- Utilized Postgres and Express.js to complete the back-end.
- Built via React - html and css for DOM rendering and styling
- Utilizes JWT and bcrypt, ensuring passwords are efficiently hashed and secure, letting users have a comfortable experience with the site..
- Web-site also features an admin page where an administrator can create, remove, or edit reviews/restaurants.

Band Website | Full Stack Developer | Sep. 2023 | <https://github.com/ajSeadler/Disco-Stranger-Site> | discostrangermusic.com

- Created a professional website for the rock band "Disco Stranger," to enhance their online presence and engage with their audience effectively.
- Designed and developed a visually appealing and responsive website that showcases the band's music, videos, and upcoming events.
- Implemented a countdown timer to build excitement for the band's upcoming shows.
- Utilized HTML, CSS, and JavaScript to create an engaging user experience.
- Incorporated social media integration to increase the band's online visibility.
- Ensured mobile responsiveness for a seamless user experience on all devices.

The Legend of Zelda Compendium | Full Stack Developer | Sep. 2023 | <https://github.com/ajSeadler/Zelda-Encyc> | <https://zeldainfo.netlify.app>

The Legend of Zelda Compendium is a fan made (by myself) website where users can look up various types of information from the video game series The Legend of Zelda.

- Developed a mobile-responsive web app for Zelda fans, offering quick access to in-depth information on games, dungeons, monsters, and equipment.
- Leveraged React and a REST API for a seamless user experience, focusing on responsive design and efficient data display.

EcoSync (Fake product site) | Full Stack Developer | Oct. 2023 | <https://github.com/ajSeadler/ecosync> | <https://fakeproduct1.netlify.app/>

The EcoSync Smart Garden website is a visually appealing and user-friendly online platform that showcases expertise in web design and development. Key highlights of the website include:

- **Responsive Web Design:** Designed a fully responsive website that adapts to various screen sizes and devices, ensuring an optimal user experience on both desktop and mobile.
- **Mobile-Friendly Navigation:** Implemented a mobile-friendly navigation menu with a toggle button for seamless navigation on small screens, enhancing accessibility for mobile users.
- **Interactive Features:** Enhanced user engagement with interactive elements, such as smooth scrolling, hover effects, and a dynamic mobile navigation menu that opens and closes when needed.
- **Hero Section Optimization:** Improved the hero section with an eye-catching image, overlaid text, and call-to-action buttons, creating a visually appealing and professional introduction to the website.
